Subject: Request for support

The Romanian College of Physicians fully supports the Czech Medical Chamber in all its steps, considering that the problems which the chamber faces are present in all countries from Central and Eastern Europe; this is a proof that in all former communist countries there is obviously a lack of dialogue between authorities and representatives of the medical body as well as there are numerous proofs of the lack of respect that the authorities show towards physicians and their professional body.

Yours sincerely,
Prof. Dr. Vasile Astarastoe
President
Romanian College of Physicians
